Introduction
This section should talk about,

- purpose of the project management plan,
- intended audience to this document>

Executive Summary of Project Charter
This should outline objectives and summary of the approved project charter. Provide location reference of the project charter here. High level business needs expected to be addressed by the project are to be outlined. Make sure to outline any assumptions and constraints as mentioned in the project charter.>

Scope Management
This paragraph should outline main high level requirements, references to the main requirement documents location. Work breakdown structure is to be highlighted here.

Scope management plan
Here should outline how scope is maintained and changes are managed.

Project deployment plan
Also provide project deployment plan, project soft requirements (non-functional requirements such as performance, availability, maintainability etc.

Scope baseline
Information such as Scope statement, WBS, WBS dictionary are mentioned, or reference to those documents is provided here.>

Requirements
High level requirements are mentioned, and link to the detailed requirements is provided here.

Issues and Concerns

Assumptions

Dependencies

Unknowns
Change management plan
<Change management plan is highlighted here. Change control board, its members, their details, process of managing changes, frequency of meeting, and any other related information is outlined here.>

Schedule Management
<This section should highlight the high level schedule, milestones, release criteria, release needs for milestones. Detailed schedule management plan also is mentioned here. Reference link to the project schedule also is provided.>

High level schedule
Release criteria

Milestones and tentative release dates
